SUMMARY

Full Stack Developer with a strong backend focus, known for owning systems end-to-end and delivering production-grade SaaS architecture independently. Have served as sole backend architect on a live multi-panel real estate platform and built a multi-tenant CRM from scratch—both shipped to production. Thrive in environments where ownership is expected early and problems are complex. Looking to grow into a senior engineering role at a product-driven company where I can contribute meaningfully from day one.

EXPERIENCE

Web Developer

Mar 2025 – Present

Maity Innovations Pvt. Ltd.

West Bengal, India (On-site)

- Sole backend architect for a multi-panel real estate SaaS — designed system architecture end-to-end, covering Customer, Admin, Supplier, and Constructor panels with strict data isolation between roles.
- Integrated Razorpay payment gateway with webhook handling for real-time transaction status sync and slab-based payment scheduling.
- Designed and implemented JWT-based authentication with granular RBAC across all panels — role definitions, permission inheritance, and middleware enforcement handled from scratch.
- Set up Docker-based CI/CD pipelines with GitHub Actions, cutting manual deployment steps and ensuring consistent production releases.

Web Developer Intern

Nov 2024 – Feb 2025

Maity Innovations Pvt. Ltd.

West Bengal, India (On-site)

- Built full-stack web applications using React, Laravel, Node.js, and PostgreSQL; owned database schema design and REST API development independently.
- Delivered responsive, accessible frontend interfaces and authentication flows from scratch.
- Conducted code reviews for fellow interns, reducing bug discovery time during QA cycles.

PROJECTS

NEXT-CRM | *Next.js, Node.js, PostgreSQL, Redis, Docker* | nystack.vercel.app

2026

- Built a Bitrix24-style CRM SaaS supporting **multi-company tenancy** — each company gets isolated data with a shared infrastructure model, reducing hosting cost vs. per-tenant DBs.
- Designed granular RBAC system with role inheritance; supports custom roles per tenant with field-level permission control.
- Includes analytics dashboard, team collaboration, payroll module, and AI-powered insights layer.

Real Estate Bidding Platform | *Node.js, Express.js, PostgreSQL, Razorpay, Docker* | *Company Project*

2025

- Architected backend for a multi-panel real estate platform supporting **4 user roles** with a unified system design, reducing system fragmentation and maintenance overhead.
- Designed a scalable vendor bidding engine with slab-based payment workflows; integrated Razorpay with webhook handling for reliable real-time transaction updates.
- Built to handle concurrent multi-role interactions with optimized API design and database queries, ensuring low-latency performance under load.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, SQL

Frontend: React.js, Next.js, Redux, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, REST APIs, GraphQL, WebSockets

Databases: PostgreSQL, MySQL, MongoDB

DevOps & Tools: Docker, GitHub Actions, CI/CD, Git, Linux, Nginx

Other: RBAC, JWT, Razorpay, Multi-tenant Architecture, System Design

EDUCATION

Master of Computer Applications (MCA)

2022 – 2024

Dr. B.C. Roy Engineering College, Durgapur (MAKAUT)

CGPA: 7.8 / 10.0

Bachelor of Computer Applications (BCA)

2019 – 2022

Vidyasagar University

79.48%
